

## Pet Print Jewellery Guide:

### **How easy is it to take a print?**

The putty for noses or paw print textures is very easy to use. Simply mix the two colours into a uniform colour and then press onto the nose or pad of the foot. For an ink print you can simply wipe across the paw and press their paw onto paper. We supply enough material for lots of attempts although if your pet is particularly long haired, we recommend trimming before taking the print.

### **What can I fit on the back of the nose pendant?**

Depending on the size of your dogs nose you should be able to fit either a fingerprint or a paw print & a name and date of birth.

### **Delivery:**

The jewellery takes 4 – 7 weeks to deliver and will be fully hallmarked if the jewellery is over the legal requirements. The jewellery will be posted back to you unless otherwise arranged and will come beautifully gift-wrapped & presented with a luxury jewellery box.

## **Design:**

We offer a bespoke service and our aim is to give you the chance to design something perfect for you of your furry friend. If you have a design in mind or would like to design something unique incorporating your pets prints, please get in touch.

## **Can my dogs nose be cast in gold?**

Yes we can cast your dogs nose in yellow and rose gold, or we can also gold plate your pendant however this will need to be re done every so often to keep the plating.

## **Can I take prints of another animal?**

Yes if you can take a print we can turn it into jewellery, we have taken moulds from shedded snake skins, rabbit paw prints, cats noses and much more.
